Midterm Proposal

For the midterm I plan on doing something that will aid me in the long run, so I want to craft a website that will remain useful for me after the class. One website that I think will remain useful for me after the class is a portfolio website, one that can be used to show what my capabilities as a webdesigner are when given full creative control. For the midterm I plan on doing a portfolio website that can showcase my design via the content and my webdesign skills by the webpages themselves.
